Project POLAND

Limitation in Existing System

Only one language requirement is listed with a position, when the position could possibly have two or more requirements, i.e. German and French or Polish.

These requirements are reflected in the recap, which precedes the organizational unit. However, this recap might very well be 5 or more pages removed from the listing of the language position.

Recommendation

List all language requirements both in the recap and with the position. This will provide greater flexibility for user who currently has to flip-flop back and forth between the recap and the language designated position to determine what the requirement actually is while maintaining manual controls for assignment of personnel.
